ASSISTANT ELECTRICAL MAINTENANCE MANAGER

TULLY SUGAR LIMITED is a subsidiary of COFCO Corporation, a Fortune 500 company and one of the largest food and agribusinesses in China. It owns and operates a large, efficient sugar mill, producing quality raw sugar and renewable energy in Tully, North Queensland. The Company and its operations are highly regarded in the Australian Sugar Industry. Depending on seasonal conditions, Tully Mill crushes in excess of 2.4 million plus tonnes of cane per year, producing approximately 300,000 tonnes of sugar.

Tully is located approximately halfway between Townsville and Cairns surrounded by World Heritage rainforest and the Cassowary Coast and Islands adjacent to the popular Mission Beach area. The 5000 strong community of Tully has well established educational, health, sporting and shopping facilities.

This role is a rare opportunity to combine your leadership and technical capability in a sophisticated heavy industrial processing environment. The factory spends about half a year processing on a 24 hour, 7 day a week basis, and the other half of the year on capital works, maintenance, and improvement, hence this position will require call outs and overtime to be worked as required.

Assistant Electrical Maintenance Manager: Reporting to the Electrical Maintenance Manager, you will work as part of the Maintenance Leadership team to ensure the Company's operational, maintenance, and development priorities are effectively implemented.

Applicants will ideally have Electrical and/or Instrumentation Trade Qualifications and a current Queensland Electrical Licence, supported by tertiary qualifications such as an Associate Diploma or Associate Degree of Electrical Engineering.

As an indication, 5-10 years exposure to manufacturing, processing, or heavy industrial environment would be an ideal foundation for this role. You will be able to demonstrate successful workgroup leadership /supervision, including a strong understanding and commitment to contemporary safety practices.

Previous experience in the following would also be an advantage:-

- Power generation, HV and LV and Motor Control Systems
- SAP Plant Maintenance or any computerised maintenance management system
- ABB process control systems

Qualifications in Frontline Leadership or Management would be ideal, together with proficiency in the Microsoft suite of products, in particular Word and Excel.

The Benefits: A great lifestyle and an attractive package will be negotiated with the right person. We can offer relocation expenses and are always keen to see our people develop through ongoing training and challenging roles.

Phone enquiries should be initially directed to Ian Speziali 07 40 684 726. Applications will close on Tuesday 2nd October 2018 and should be emailed to: abarrie@tsl.com.au or addressed to:-
